

## What We Provide: Hyperbaric Oxygen Therapy (HBOT)

Our exclusive, medical grade, hard chamber HBOT technology increases the “oxygen gradient” in damaged oxygen starved tissues acting like a “catapult” to increase cellular energy which:

- Increases new blood vessel & tissue growth
- Reduces swelling and pain
- Increases collagen production
- Improves immune response
- Inhibits bacterial infections

HBOT is proven effective for use in partnership with traditional medical care and rehabilitation.

### Conditions Benefited By HBOT

- Non-Healing Wounds
- Stroke
- Chronic Fatigue
- Autism & Cerebral Palsy
- Traumatic Brain Injury
- Sports Injuries
- Chronic Pain
- Spinal Cord Injury
- Chronic Lyme Disease
- Diabetic ulcers
- Bed sores
- Post Radiation Effects
- Compromised Skin Flaps/Grafts
- Post-Surgical Recovery
- And many more...

Our Award Winning Facility and Staff Provide Patient Support, Empathy, and Advocacy.

### Testimonial

Tiburon grandmother avoids amputation and regains independence with Hyperbaric Oxygen Therapy!

*“I avoided amputation, went from a wheelchair to a walker, to a cane, then moved back to my own home and got my life back!” -Maryann~Tiburon*

In this economy, so many families and individual patients are suffering due to the inability to afford treatment- even if it could save their lives. We are bridging that gap by educating charitable foundations, organizations and individuals about the benefits of HBOT and encouraging them to donate NOW to save lives.

### The Need:

Children, veterans, teachers, firefighters, mothers, grandfathers...all in need of hyperbaric oxygen therapy treatment

### Testimonial of H.O.P.E.

*Tristan is 4 years old. He is a wonderful extraordinary son but everyday he is faced with the great challenges and struggles of developmental issues and brain injury.*

*To this day he has never been able to say, "Mommy, I love you." I have spent many nights in tears praying that there could be hope, a way to help him, speak his feelings and to help him heal. Please, help our son Tristan to get better and to come back to us.*

*~ Paige M. (Mother)*

### Mission:

**Our Mission** is to alleviate suffering and improve quality of life, through Hyperbaric Oxygen Therapy (HBOT). To educate and motivate our communities to support HBOT for the poor and disabled. H.O.P.E. is saving life and limb, healing physical and emotional pain and restoring independence and self reliance.

### What We Have Done:

H.O.P.E. for Healing Institute has supplemented Hyperbaric Oxygen Therapy(HBOT) treatments for 44 individuals over our first 3 years of existence. Of those patients, 11 were seniors and 6 were children. All were low-income or indigent. Of the patients whose HBOT treatment we supplemented, 84% showed moderate to complete recovery. Benefits to patients from HBOT include the avoidance of amputations, complete reversal of radiation burns, reduction of paralysis, and decrease or elimination of pain.

### Our Goal:

We believe passionately in being active participants in the communities in which we serve. Our goal is to work to educate physicians about hyperbaric oxygen therapy with research, case studies and proven protocols. We educate organizations and groups that provide leadership services in our community, about HBOT. Unfortunately the patients who need hyperbaric oxygen therapy the most maybe severely disabled, on SSI, and cannot afford it. We have provided treatment to many people in need at cost and below cost and strive to help others in the future but can only do so with your help. Our goal is to treat everyone on our waiting list and reach out to others in need.

### What Can I do to Help?

For nearly 4 years our center has donated and lead in the treatment of low income and no income, disabled patients. Now is the time and opportunity for our community to donate funds that are necessary for us to continue improving quality of life.

Give the "Gift of Healing" by donating \$10.00-\$10,000 to H.O.P.E. for Healing Institute.

Patients in need are waiting now.

Please call (415) 785-8652

### Need to Be Considered?

If you would like to be considered for a Hyperbaric Oxygen Therapy scholarship, please send us your photo and your story (500 words or less) telling us why you need hyperbaric oxygen therapy\*!

Your story will be posted on the website and scholarships will be awarded according to medical necessity and awarded funds as decided upon by a medical board. Send your submissions to:
